Professional Summary

Computer Science undergraduate at VNR VJiet with a CGPA of 8.4, specializing in full-stack development, AI-enabled applications, automation systems, and data-driven software. Experienced in developing scalable applications using Python, FastAPI, React, PostgreSQL, Flutter, and LLM APIs. Built end-to-end academic systems spanning AI/ML pipelines, REST APIs, healthcare monitoring, and conversational AI. Solved 100+ competitive programming problems and actively develop production-oriented software systems.

Education

VNR VJiet

Bachelor of Technology in Computer Science and Engineering

Hyderabad, Telangana

Aug 2024 – Present

• **CGPA: 8.4/10** • Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming through Java, Probability and Statistics, Discrete Mathematics, Problem Solving Using C

Technical Skills

Programming Languages: Python, Java, C, SQL, JavaScript, HTML/CSS

Frameworks & Libraries: FastAPI, React, Node.js, Flutter, Streamlit, Flask, Pandas

Databases & Data Systems: PostgreSQL, Redis, Data Analytics

AI / NLP: Large Language Models (Ollama), LLM APIs, Prompt Engineering, Text Processing

Developer Tools: Git, Docker, Docker Compose, Google Cloud Platform, VS Code, PyCharm

Software Engineering: REST API Development, API Integration, Debugging, Testing

Projects

IntelliCredit | AI, Python, Machine Learning, Streamlit, Pandas, REST API, Cloud 2026

- Deployed an AI-powered credit risk assessment platform on Streamlit Cloud for real-time loan eligibility prediction through an interactive web interface.
- Engineered an end-to-end machine learning pipeline covering financial data preprocessing, feature engineering, and credit scoring for reliable risk prediction.
- Integrated REST APIs with a modular backend architecture to automate financial data extraction and risk analysis.
- Structured the application for scalable deployment and future model expansion through modular data-processing and inference components.

Recovery Companion | Flutter, FastAPI, PostgreSQL, Docker, Google Cloud AI, LLMs 2026

- Developed an AI-assisted healthcare recovery platform combining a Flutter mobile application with a FastAPI backend for post-discharge monitoring.
- Architected a modular backend using PostgreSQL, Docker, and REST APIs for patient management, recovery tracking, and scalable healthcare workflows.
- Implemented Gemini-powered multilingual voice check-ins and computer vision-based meal analysis for personalized recovery monitoring.
- Integrated automated drug interaction detection to surface personalized recovery insights and support safer medication management.

SIENNA – Configurable AI Chatbot System | Python, Flask, LLM APIs, Backend Development 2025

- Engineered a configurable AI chatbot using Flask and Groq LLM APIs to deliver real-time conversational responses through low-latency API integration.
- Designed configurable AI personality parameters including humor, honesty, and authority compliance for adaptive conversational behavior.
- Implemented scalable session management and modular backend services supporting persistent conversations and API orchestration.
- Structured the backend for future feature extensibility through configurable services and reusable conversational components.

Activities & Interests

Competitive Programming: Solved 100+ algorithmic problems across CodeForces, CodeChef, and LeetCode; CodeChef Div 3 rating: 1538.

Certifications

- Power BI and Data Analysis – Infosys
- Google Cloud Certification – Google Study Jams
- AgentBlazer Champion 2026 – Salesforce
- Data Structures and Algorithms – Smart Interviews (Ongoing)
